

## Investigate Anonymous Threat Actors

### Identify and attribute anonymous risks targeting your organization

Today's cybercriminals are more advanced and better funded than ever before. They operate with a high level of anonymity, using underground forums, aliases and cryptocurrency to obfuscate their activities and hide their identities.

This makes your job of disrupting these adversaries increasingly difficult, requiring innovative data scouring and collection methods to uncover critical intelligence that will move an investigation forward.

Constella Hunter is an intuitive investigations platform that enables you to quickly identify malicious activity and attribute that activity to real-world identities. With Hunter, you can analyze data from thousands of sources, collate and compare it across sources, and identify unknown connections and networks of activity.

### Solve Investigations 3X-5X Faster

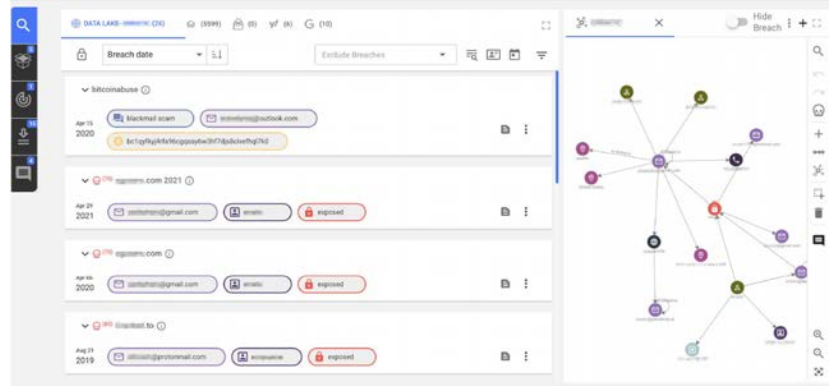

Hunter delivers real-time and historical identity intelligence that helps you solve cases 3X-5X faster. Hunter discovers the hidden connections that other tools and teams miss with its unique analytics engine and massive scalability.

Hunter is designed to accelerate and simplify investigations and threat analysis by:

- Bringing together data from thousands of sources.
- Providing full customization of the queries to deliver high-value results.
- Enabling the visualization of intelligence in an easily consumed format.

### Unmatched Visibility

Hunter collects data from across the Surface, Deep, and Dark Web, and social media. It combines data from these thousands of sources with the Constella Data Lake™, containing over 66 billion compromised identity records, to deliver unmatched visibility of threat actor activity.

#### HUNTER HIGHLIGHTS

##### ► Single Indicator is All You Need

Start with a single indicator and enrich information from other sources and begin making connections, in realtime.

##### ► Correlated Data

Correlate activity across data sources to identify new accounts and data associated with your target.

##### ► Data Visualization

Build data visualizations in a graphical format that enables you to understand links and conduct advanced analysis.

##### ► Integrated Automation

Create profiles automatically based on commonalities of results using the AIbased classifier.

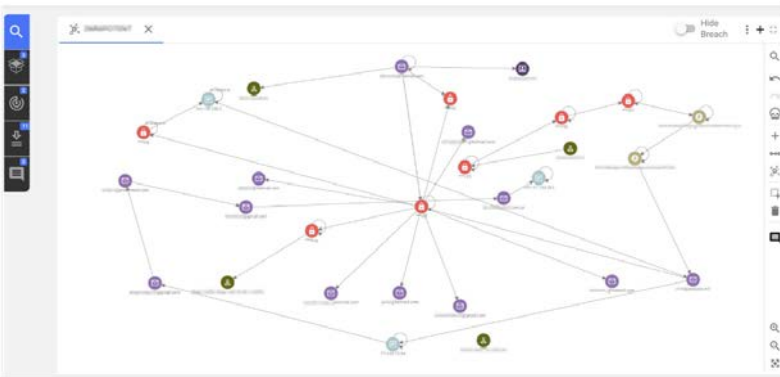

## Fast, Simple Searches

Focus your search using a simple and intuitive search bar. You can search for over 30 different attributes and keywords across multiple sources (either individually or one at a time).

- Link data from Surface, Deep, and Dark Web and Social Media sources and easily move between them.
- Search the Constella Data Lake™ to access 66+ billion compromised identity records.
- Conduct a bulk search, identify related searches, view your search history and investigate domain exposure.

You have the ability search on any result to conduct a detailed investigation, such as identifying accounts using the same password and searching for social media profiles.

## Visualizations

You can visualize any attributes you have identified from within the platform using the graph workspace. It's customization capabilities enable you to easily add information to the graph, change the shape, view metadata and upload / download graphs to other platforms.

## ABOUT CONSTELLA INTELLIGENCE

Constella Intelligence is a global leader in Digital Risk Protection, safeguarding 30M+ global users at some of the world's largest organizations, including 5 of the top 10 U.S. banks. Our solutions are a unique combination of proprietary data, technology, and human expertise to anticipate, identify, and remediate targeted threats to your people, your brand, and your assets at scale—powered by the most extensive breach and social data collection on the planet from the surface, deep and dark web, with over 131 billion attributes and 66 billion compromised identity records spanning 125 countries and 53 languages.

## WHY CUSTOMERS CHOOSE HUNTER

### ► Unique, Rich Data Sources

Discover hidden connections and tools that fuel criminal activity.

### ► Attribution, Pivot & Enrich Data

Break down traditional barriers across data silos; Link real identity information to obfuscated identities & malicious activity; solve investigations 3-5x faster.

### ► Relationship Graphing & Investigation Management

Build and collect evidence and submit to LEA / Dept of Treasury; decrease losses and reduce risk of future attacks.

### ► Seasoned Team with a Single Mission

The Constella team consists of intelligence community analysts, infosec pioneers, military veterans and tech entrepreneurs with a single mission: Empower organizations to know their adversary and disrupt malicious activity.
