

Dome External Risk Protection Platform

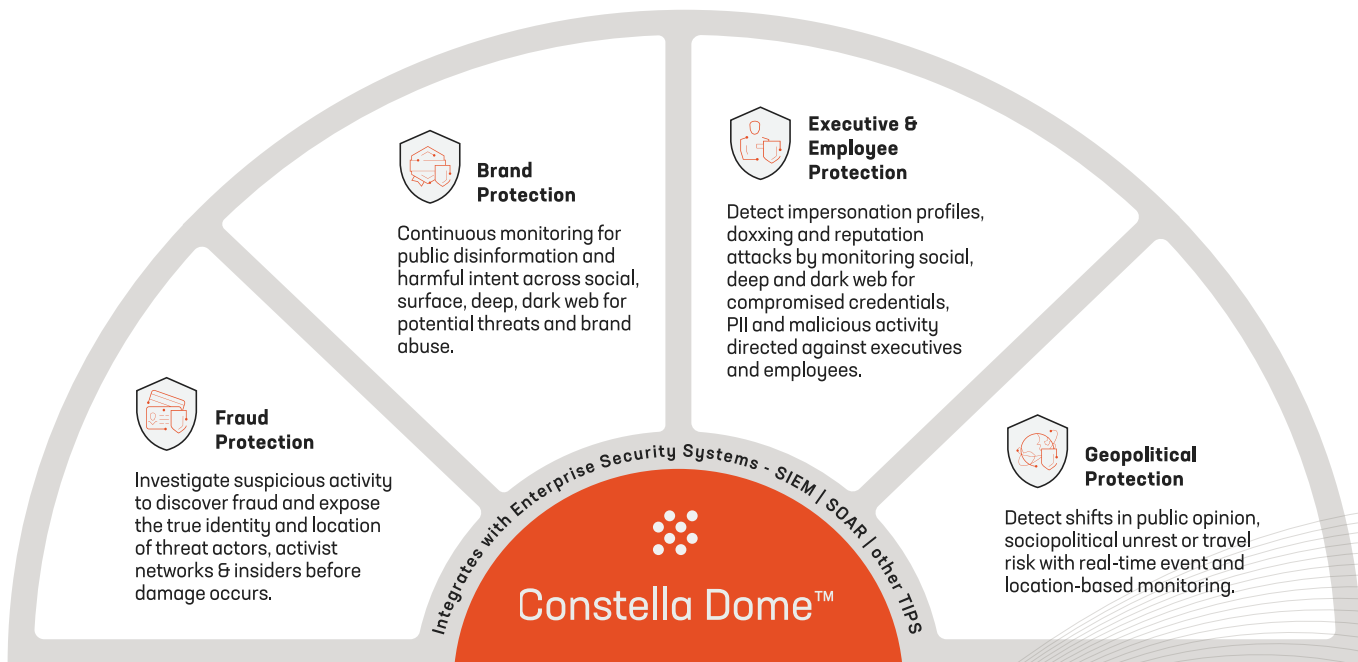

Protect Your People, Brand and Assets from Cyber and Physical Threats

External threats targeting your organization come in many forms: account takeover using stolen credentials to gain access to valuable data, brand abuse to defraud customers, or hostile cyber or physical activity attempting to disrupt your operations.

Unfortunately, most organizations do not have visibility to anticipate these types of external threats. The information used to target executives and employees, online presence, critical infrastructure, or supply chains all reside on systems and platforms outside of their control.

Respond Faster to Threats with Real-Time Risk Intelligence

Dome's continuous monitoring across Social Media, Surface, Deep & Dark Web delivers real-time alerts on external digital risks. Get actionable insights when we detect cyber or physical threats like executive impersonation, compromised credentials, fraudulent web sites, disinformation campaigns, or protest events. These context-rich alerts enable you to respond to threats faster, before it puts your people at risk, or inflicts damage to your reputation or critical infrastructure.

“Constella’s Dome platform is a critical tool we use to protect our executives, employees, and company from threats. It allows us to monitor hundreds of our executives and key employees to ensure that we can identify and respond faster to external risks.”

- SVP, Information Security - Global Investment Bank

Protect Your Organization from Cyber and Physical Threats

Choose the right amount of protection for your organization with Dome’s modular architecture. Each module delivers:

Automation and Scalability: Protect any number of executives & employees, brands, or locations and eliminate manual processes.

Continuous Monitoring: Detect and mitigate external digital threats over time, before they can disrupt your operations.

Real-time Alerting & Response: Block compromised credentials, initiate takedown of exposed data, or identify threat actors.

Seamless Integration: Accelerate response by integrating with onboarding, analysis, SOC response, and ticketing systems.

Global Reach: Monitor thousands of data sources and millions of data points to detect targeted attacks that other miss.

Dome Executive Protection / Employee Protection

Protect your executives and employees from threat actors who use exposed credentials and PII to access corporate data and systems, or create impersonation profiles. In extreme cases, these cyber threats can evolve into physical threats, putting them and their families at risk.

- **Dome Employee Protection** monitors the Constella data lake, Data Brokers, and the Surface Web for compromised corporate credentials and personal information.
- **Dome Executive Protection** builds on Dome Employee Protection with detection of impersonation profiles, hacktivism, doxing and reputation attacks. It monitors the Deep and Dark Web and Social Media for compromised data, hostile communications, and malicious activity directed against executives.

Dome Brand Protection

Protect your brand, your relationship with your customers, and your revenue from reputational damage.

- Detect and take down a broad range of threats as soon as they appear, including typo-squatting and phishing sites, fake profiles, and misleading content on social media channels.
- Know when threatening communities, conversations, and threat actors are discussing your brand on dark forums and messaging platforms.
- Learn when your corporate credentials, confidential data or intellectual property such as source code has been leaked .

Dome Geopolitical Protection

Quickly discover global and regional risks and threats to your organization’s initiatives and programs by assessing their potential impact. Gain critical risk intelligence to inform your decisions and response strategy.

- Awareness of rapidly evolving local political, economic, and social situation within or across geographic regions.
- Discover and gain visibility into key communities and an actors’ online activity that may evolve into a threat to executives or facilities.
- Identify the use of fabricated content to damage reputation or influence public opinion.
