

Telefónica Tech and Constella Intelligence *join forces* to increase digital protection for customers around the world

Telefónica and Constella will work to provide integrated **Cyber Security assistance** and **threat protection**, among other services to their partners and customers. The partnership will build upon an already strong relationship between the two companies. As **Constella's 2022 Identity Breach Report** revealed, global uncertainty precipitates greater cyber risk. Navigating an ever-changing digital landscape will require increased insight, threat analysis, and data mining.

Constella users and current Telefónica Tech customers will be able to benefit from this alliance, allowing for in-depth data protection and cyber security portfolios across the globe.

Telefónica Tech

Telefónica Tech is the leading company in **digital transformation**. The company has a wide range of services and integrated technological solutions for **Cyber Security, Cloud, IoT, Big Data, and Blockchain**.

Constella
INTELLIGENCE

Constella Intelligence's proprietary technology will enable access to the largest collection of breach data on the planet, with **+66 billion** compromised identity records and **+161 billion** validated attributes that help deliver comprehensive risk protection and anticipation to consumers.

Constella's most recent research shows **how consumers, employees, executives, and brands are at increased risk of cyber hostilities**—with new research highlighting that the price of fraudulent credentials sold in dark marketplaces increased

100%
year over year.

78%

of executives at companies within the **Dow index** have fallen victim to data breaches and cyber infiltration.
